

Ajinkya N. Survase

B Tech CSE Student — AI/ML Enthusiast — Aspiring Software Engineer

✉ ajinkyasurvase13@gmail.com ☎ 7499656079  [ajinkya7499](https://www.linkedin.com/in/ajinkya7499)  [Github](https://github.com/ajinkya7499)

CAREER OBJECTIVE

Final-year B.Tech student in CSE with hands-on experience in building AI-powered applications using Python, Machine Learning, and FastAPI. Skilled in developing intelligent systems, model deployment, and scalable AI solutions. Seeking an AI Engineer role to contribute to enterprise-grade AI systems and real-world intelligent automation solutions.

EDUCATION

B Tech Computer Science and Engineering	CGPA: 8.98 / 10
SVERIs College of Engineering ,Pandhapur	2022 – 2026
XII Maharashtra State Board	63.33
X Maharashtra State Board	84.40

INTERNSHIPS

Webvarad Solutions, Mumbai

- Developed and maintained responsive web applications using modern frontend and backend technologies, ensuring optimized performance and user-friendly interfaces.
- Designed and implemented FastAPIs and integrated databases to enable seamless data communication between application components.

PROJECTS

RAG Based AI Teaching Assistant

- Intelligent educational assistant that leverages Retrieval-Augmented Generation (RAG) and Large Language Models (LLMs) to provide accurate, context-aware responses from academic resources.
- The system processes educational documents, converts them into vector embeddings, stores them in a vector database, and retrieves relevant knowledge

Onion crop Disease Prediction and Monitoring

- Developed an AI-powered onion crop disease prediction and monitoring system using **MobileNet-based deep learning models** with **TensorFlow and Keras** for accurate disease classification from leaf images.
- Built an interactive **React frontend** and **FastAPI backend** to enable seamless image uploads, real-time disease prediction, and result visualization.

Concrete Strength Prediction using ML

- Developed an ML-based concrete strength prediction model using **XGBoost**, achieving accurate strength estimation from concrete mixture parameters.
- Implemented data preprocessing, feature selection, and model training to optimize predictive performance.
- Built a scalable prediction workflow for real-time strength analysis and decision support.

SKILLS

Programming & Databases: Python, FastAPI, HTML, CSS, Java-Script, SQL

AI & ML: Machine Learning, Numpy, Pandas, Matplotlib, Model Evaluation, Data Preprocessing

LLM & AI Systems: Prompt Engineering, LLM Integration, AI Automation Workflows

Dev Tools: Jira, DevOps, CI/CD Pipelines, Power BI, Advanced Excel

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Software Development

CERTIFICATIONS

- Python for ML
- The Ultimate Job Ready Datascience

ADDITIONAL INFORMATION

- Strong interest in building scalable AI systems and intelligent automation solutions
- Lead project competitions and Hakathons in national level competitions .
