

GAJANAN VISHWAMITRE

Pune, Maharashtra, India

+919521442253 — vishwamitregajanan@gmail.com — LinkedIn: Gajanan01 — GitHub

Objective

M.Sc. Data Science graduate skilled in Python, SQL, MySQL, Power BI, Data Analysis, and Machine Learning. Experienced in dashboard development, ETL processes, data visualization, and transforming data into actionable business insights.

Technical Skills

Programming: Python

Databases: SQL

Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn

Visualization: Power BI, Excel

Tools: Jupyter Notebook, Pycharm, VS Code, GitHub

Concepts: ETL, Data Warehousing, KPI Reporting, EDA, Business Intelligence

Work Experience

Data Analyst Intern — Opine Group

- Analyzed NGO expenditure data to identify spending patterns and fund utilization.
- Evaluated budget allocation efficiency and highlighted high-cost areas.
- Generated insights and recommendations for cost optimization and resource management.
- Created reports and dashboards using Excel, SQL, and Power BI.

Data Annotator Intern — Qualitas Global

- Annotated and validated datasets to support AI and Machine Learning model development.
- Performed quality assurance checks to ensure data accuracy and consistency.
- Identified and corrected data inconsistencies to improve dataset reliability.
- Collaborated with teams to deliver high-quality training data within project timelines.

Projects

Manufacturing Performance Dashboard — Power BI, MySQL, Python

- Developed an interactive manufacturing dashboard with KPI monitoring and trend analysis.
- Built a MySQL database and integrated it with Power BI for reporting.
- Created visualizations for production, revenue, cost, and defect analysis.

SQL Data Warehouse & Analytics — SQL Server

- Developed a scalable data warehouse handling 500K+ records.
- Implemented Medallion Architecture (Bronze, Silver, Gold) for ETL workflows.
- Reduced query execution time by 40% through SQL optimization and indexing.

Fake News Detection System — Machine Learning, NLP

- Built an ML-based system to classify news articles as real or fake.
- Applied NLP techniques including text preprocessing and TF-IDF vectorization.
- Trained and evaluated classification models to improve prediction accuracy.

Education

M.Sc. Data Science

Abasaheb Garware College, Pune

2025

B.Sc. Mathematics

vishwakarma college, Pune

2023

Certifications

- Data Analytics Project Using Python & Power BI – PySpiders Pune
- Certificate Course on Data Analysis and Visualization – Opine Group
- Machine Learning for Health Care – MIT (Coursera)
